For over 90 years the Fimbel Family has redefined "cutting edge", bringing to the forefront new products and innovative designs. Legacy is the Ultimate, Low-Maintenance, Vinyl, Flush, or Raised Panel Door. Low-maintenance and high functionality in a superior design make Legacy an investment that will add long-lasting curb appeal and value to your home.

...Low Maintenance

Legacy is a highly energy-efficient, insulated door. It will not dent easily or rust like steel. It also will not radiate heat or cold through the door section - a notorious downfall of conventional stamped steel doors. Also provided in our standard package is a matched, heavy-duty combination of high-quality springs and hardware ensuring years of reliable operation.

The Legacy series is available in 8', 9', 10', 15', 16', and 18' wide by 6'6", 7'0", 7'6", and 8'0" high in the standard designs shown below. Custom sizes are also available on a limited basis. Our unique manufacturing gives us flexibility to meet your special jobsite demands better than a stamped steel door. Please consult the Factory to discuss your options.

The Legacy series pays tribute to the three generations of the Fimbel Family, who manufactured flush and raised panel doors from both wood and steel. Legacy is a perfect product for individuals who either don't have a home with a design that lends itself to a carriage door, or simply prefer the look of a traditional raised panel door and are particular about having a high quality product. Unlike the stamped steel alternatives, Legacy has a smooth face with a slight grain, which is preferred over the faux stamped steel grain of standard steel doors. Legacy also has no need to use plastic inserts in the glass section which significantly improves the quality of the top's appearance. It is exceptionally durable, resistant to denting, impervious to rust, and made with remarkable quality. If this is the look you desire, you will not find a better product.

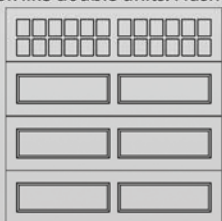

Curb Appeal...

Standard Panel Designs

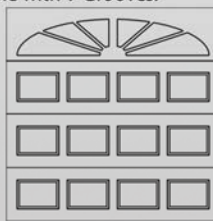

Notes:
15', 16', and 18' Wide doors are made to look like double units. Flush door not available with V-Grooves.
