Ultra Low-Maintenance Vinyl Carriage House Doors

**Durable one piece vinyl face construction - at home in harsh environments.
Available in Flush and Simulated V-Groove Batten styles.**

For over 87 years the Fimbel Family has redefined "cutting edge", bringing to the forefront new products and innovative designs. Euro-Dor is the ultimate carved vinyl Carriage House Door. Low-maintenance and functionality in a superior design make Euro-Dor an investment that will add long-lasting curb appeal and value to your home.

...Low Maintenance

The Euro-Dor is an insulated 1 1/2" thick Carriage Door. The exterior and perimeter joints are solid High-Impact Vinyl which completely seals out the elements. This highly weatherable carved PVC exterior can be left natural white, or can be Factory Finished. We use High-Performance, Heat Reflective, Molecularly Bonded finishes that carry a full 15 year warranty.

Euro-Dor looks great and out-performs steel and wood doors on every level. It will not dent easily or rust like steel. Insulated and energy-efficient, Euro-Dor will not radiate heat or cold through the door section - a notorious downfall of conventional stamped steel doors. It's face will not warp, check, split or rot like wood. Additionally, Euro-Dor has recyclable components.

Curb Appeal...

The Euro-Dor series is available in 8', 9', 10', 15', 16' and 18' wide by 6'6", 7'0", 7'6" and 8'0" high in the standard designs shown below. You can also swap out the top section, which is available in 6, 8, 12, and 16 lite designs, as well as a solid arch or square. Rounding out the package is a heavy-duty combination of high-quality springs and hardware, ensuring years of pleasurable operation. Should the need arise, we will be happy to provide you with a custom look or size. Please consult the Factory for additional information.

Upgrade Your Home...

Standard Euro-Dor Designs:

Note: 15', 16', and 18' Wide doors are made to look like double units.
