technology

The Fimbel Family has been designing and engineering custom doors since 1924, with attention to detail and a focus on Quality. The **Roaring Twenties Raised Panel** Series provides an elegant Architectural look. It requires very little maintenance and offers unsurpassed durability, at a price which is hard to beat. It is the World's Finest Raised Panel Carriage House Door.

...Sophisticated

The **Roaring Twenties Raised Panel (RTRP)** series is an insulated 1 3/4" thick Carriage House Door built using our durable Vinyl Composite Technology. The face is precision machined into Deep Raised Architectural panels, and overlays for the **RTRP** are Coped and Beaded, adding elegance to a simply beautiful door. Not only does this door look great, but it outperforms wood and steel doors on all levels.

The highly weatherable PVC exterior can be left natural white or Factory Finished. Our high performance, heat reflective finishing system has its own 10 year warranty. Please consult the factory for area-specific color palette availability.

...Majestic

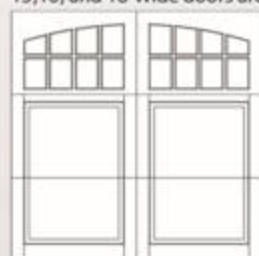

Roaring Twenties Raised Panel Series doors are readily available in sizes that include 8', 9', 10', 15', 16', and 18' wide by 6'6", 7'0", 7'6" and 8'0" high, in the standard designs shown below. They can quickly be furnished with our 6, 8, 12, and 16 lite stock grille designs or solid tops.

RTRP doors are also available in custom designs and sizes, and with Tru-Divide Lite tops. Our engineering department can create the special look you've been searching for for your home.

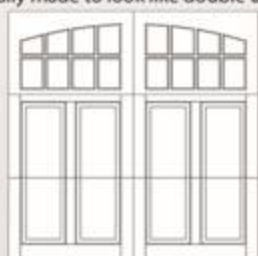

A Must-Have Look...

Standard Roaring Twenties Raised Panel Designs:

15', 16', and 18' Wide doors are typically made to look like double units.
